DUT WINTER SCHOOL

As hundreds of Kwazulu-Natal pupils celebrate the end of the second term, for many it was just a regular weekend break before beginning the Winter School Programme.

Ikamva Youth in partnership with EThekwini Municipality: Human settlement, Engineering and EThekwini Transport Authority, Trading Services Cluster and Support services Unit, conveniently hosted a one week Winter School Programme which was scheduled for the 25th to the 30th of June at the Durban University of Technology.

The winter school is aimed at offering extra tuition lessons to grade 9 and 10 learners from disadvantaged backgrounds. It was mainly hosted for Chesterville and Umlazi area as those areas were identified as in dire need of extra tuition lessons to improve the learners academic results.

Learners from various high schools were given the opportunity to enhance their

individual skills, knowledge and practical learning experiments. The programme promoted career guidance, scholarship and bursary availability. Learners were also given the opportunity to participate in fun exercises and later embarked on a fun and informative trip, which was arranged for Physical Science learners throughout the week.

English class: Tutor teaching the grade 10 learners

EThekwini Municipality aims to address scarce skills in the city by promoting Maths and Science and improving the learners performance in Science, Technology and Engineering. The team offered career guidance and mentoring throughout the programme as partners to

witness the learners determination and enthusiasm to learn more on their selected subjects.

Ms Buthelezi sharing her story on how she obtained the scholarship

The program covered 15 subjects, these included:

Grade 9

Isizulu
English
Mathematics
Natural science
Social Science
Technology
