

Invitation to register as a stakeholder and participate in the Assessment, Evaluation, Review and Updating of the Air Quality Management Plan for eThekweni Municipality

In terms of Section 15 of the National Environmental Management: Air Quality Act (Act No.39 of 2004) (NEM:AQA), all municipalities are required to develop an Air Quality Management Plan (AQMP).

An AQMP is a strategic document with a vision and goals that strives to guide air quality management activities and ensure that air quality is not harmful to health and wellbeing. The Pollution Control and Risk Management (PCRM) section of eThekweni Municipality's Health Unit developed and implemented an AQMP in 2007.

The Health Unit is embarking on a project to assess, evaluate, review, and update the AQMP in accordance with the requirements of the NEM:AQA and welcomes your participation. You can get involved in the AQMP review process in a number of ways, including:

- Registering as a stakeholder by contacting the project secretary directly or by registering on the project website : www.projects.co.za/aqmp
- Submitting comments on air quality and the review of the AQMP to the Project Secretary or on the project website
- Responding to the notice of AQMP development advertised in the local media
- Attending the public meetings, and
- Providing comment on the draft status quo report and the draft revised AQMP during the relevant comment periods

Documentation on the AQMP review project will be made available on the project page available from www.projects.co.za/aqmp
